

NUR AQILA SAFFIA BINTI SUHARDI

Puchong, Selangor | aqilasaffia@gmail.com | (+60)18-9112908
LinkedIn: <https://www.linkedin.com/in/aqilasaffia>

SUMMARY

Software Engineer with hands-on experience developing and supporting business applications, integrating APIs and databases, and delivering software enhancements from development through deployment. Proficient in Java, PHP, Flutter, Laravel, SQL, MySQL, and RESTful APIs, with experience in troubleshooting, system testing, and Agile software development.

WORK EXPERIENCE

Vmax Concept Group SDN BHD February 2026 - Present
Software Engineer

- NFC Digital Business Card:** Built a Flutter-based NFC digital card platform with Wallet-style tap-to-share functionality, Google ML Kit OCR, and Gemma AI for automated contact extraction, achieving 95% data parsing accuracy.
- LHDN e-Invoicing Middleware:** Developed a Laravel RESTful API middleware to automate LHDN e-Invoice compliance, reducing manual invoice processing time by 65% with a 99.5% successful tax payload submission rate.
- Restaurant Management System:** Developed a full-stack POS ecosystem comprising Admin Cashier, Customer Ordering, and QR Ordering applications using Flutter, PHP, MySQL, RESTful APIs, and KiplePay sandbox integration.
- Software Development & Collaboration:** Collaborated across the SDLC to gather requirements, develop features, conduct system testing and bug verification, support deployment, maintain application stability, and prepare technical documentation using Agile practices.

Setiausaha Kerajaan Terengganu (SUK) September 2025 - December 2025
Network Operation Intern

- Performed preventive maintenance on servers, switches, routers, and data center infrastructure to ensure continuous network availability.
- Configured and troubleshoot network devices to resolve connectivity issues and minimize service interruptions.
- Monitored, maintained, and documented network infrastructure and performance metrics to support management reporting and system reliability.

EDUCATION

Universiti Teknologi MARA (UiTM) - Shah Alam, Malaysia October 2022 - December 2025
• Bachelor of Computer Science (Hons.) Computer Networking CGPA : 3.19
Kolej Matrikulasi Pahang - Gambang, Malaysia June 2020 - July 2022
• Physical Science CGPA : 3.58

PROJECT EXPERIENCE

Indoor Navigating Application System in Pasar Payang using ESP32 January - July 2025
Final Year project

- Developed a Flutter-based indoor navigation application utilizing ESP32 iBeacon technology and Firebase Realtime Database to provide real-time location detection and navigation inside Pasar Payang.
- Evaluated the accuracy and usefulness in terms of response time and navigation.

Digital Forensic June 2025
• Collected, analyzed, and preserved digital evidence using HxD and Autopsy, following proper forensic procedures to ensure integrity and admissibility.
• Recovered deleted and corrupted files using Autopsy and HxD, demonstrating digital evidence recovery and forensic investigation techniques.

SIEM Dashboard Using Elastic Stack November 2024
• Built and configured an Elastic Stack SIEM dashboard for centralized log monitoring, brute-force attack detection, and real-time security visualization..
• Conducted log correlation and threat analysis to support early incident detection, improving overall security visibility.

IoT Lab: Surveillance Camera June 2024
• Designed and developed a smart surveillance system using Arduino and ESP32-CAM with integrated motion sensors, enabling real-time intrusion detection.
• Automated image capture and notification delivery, providing immediate alerts to homeowners and enhancing situational awareness.

Maze Runner Booking & Billing System January 2024
• Developed a Java Swing-based desktop booking and billing system with interactive menu selection, quantity management, input validation, and transaction processing.
• Implemented automated subtotal and tax calculation, receipt generation and printing, unique purchase ID generation, and real-time date/time display.

CERTIFICATION

Introduction to Cybersecurity
CCNP Enterprise: Core networking
CCNP Enterprise: Advanced Routing
CCNA: Introduction to Networks
CCNAv7: Switching, Routing, and Wireless Essentials
Introduction to IOT

TECHNICAL & SOFT SKILLS

- **Programming Languages:** PHP, SQL, Dart, JavaScript, Java, Python, C/C++
- **Frameworks :** Flutter, Laravel
- **Database :** MySQL, Firebase Realtime Database, Database Management
- **Core Competencies:** GitHub , API Integration, Payment Gateway Integration, Database Management, DevOps & Server Deployment (cPanel)
- **Core Soft Skills:** Analytical Problem Solving, Troubleshooting & Debugging, Technical Communication, Team Collaboration, Agile Adaptability, Time Management
- **Microsoft Office:** Word, Excel , PowerPoint.
- **Languages:** English, Malay
